ABOUT ME

4th-year Information Technology undergraduate at SLIIT with hands-on experience in network administration, IT support, hardware and software troubleshooting, and application development. Experienced in supporting day-to-day IT operations and developing web and mobile applications. Strong problem-solving and communication skills, seeking an IT Support, Network, or System Administration role.

WORK EXPERIENCE

August 2025 – February 2026

Network Engineer Intern
Trico Maritime (Pvt) Ltd

- Assisted with network administration and troubleshooting across LAN and WAN infrastructure, including routers and switches.
- Supported VLAN configuration and network connectivity to maintain reliable communication across the organization.
- Assisted with server room operations, including network equipment, switches, and basic infrastructure maintenance.
- Troubleshot and supported CCTV systems and QR payment machines, resolving connectivity and technical issues.
- Performed hardware and software troubleshooting, system configuration, and technical support for users.
- Collaborated with the IT team to identify and resolve network and infrastructure issues and maintain smooth day-to-day IT operations.

PROJECTS

Smart Reading Buddy – Research Project
Role – Mobile Application Developer / Research Team Member

- Developed a Flutter/Dart pronunciation verification module using MFCC and DTW for Sinhala-English bilingual learning.
- Implemented Visual Mouth Guide (VMG) and progressive feedback to support children's pronunciation practice.
- Developed Pronunciation Error Pattern Analysis (PEPA) to identify recurring phoneme-level pronunciation difficulties.
- Integrated SQLite for offline data storage and BLE communication with Buddy hardware.
- Technologies: Flutter, Dart, Python, MFCC, DTW, SQLite, BLE

Restaurant Management System
Role – Full Stack Developer

- Developed a web-based system for managing restaurant services, appointments, and customer records.
- Built responsive user interfaces using React.
- Developed REST APIs and backend functionality using Node.js and Express.js.
- Integrated MongoDB for application data management.
- Technologies: React, Node.js, Express.js, MongoDB

Task Master Mobile App
Role –Mobile Application Developer

- Developed an Android application for task management and time tracking.
- Implemented task creation, editing, countdown timers, and reminders.
- Developed notification functionality to help users manage task deadlines.
- Implemented persistent data storage to retain tasks after closing the application.
- Technologies: Kotlin, XML, Android Studio
